

Climate Change – Living and Learning in Interesting Times

SID VALLEY ROTARY CLUB invite you to join us in hearing about the exciting developments in efforts being made around the world to mitigate and adapt to climate change; and perhaps more importantly, to hear about the learning needed to bring about radical change in perceptions and behaviours.

This will be explained to us by two leading, locally based experts -

David Selby is Founding Director of Sustainability Frontiers. He was previously Professor of Education at the University of Plymouth and, before that, Professor of Education at the University of Toronto, Canada. A regular UN consultant, he has written and lectured widely on climate change, disaster risk and transformative environmental education. He works as a volunteer for Butterfly Conservation as well as being an avid gardener and nature photographer.

Fumiyo Kagawa is Research Director of Sustainability Frontiers. She has engaged in a wide range of education research and development initiatives commissioned by UN organizations and international and government agencies, often focusing on disaster risk, climate change and resilience building education. She is a former Rotary Club Ambassadorial Scholarship recipient.

- both are regular consultants to UNICEF, UNESCO, Red Cross, Save the Children and Plan International.

**Join us at the Blue Ball Inn, Sidford EX10 9QL on Monday 25 March'19 -
Registration 6.45pm for 7.00pm.**
